Facts

- Latest news: the height of the tower has been increased to 100 meters. Furthermore, the old building on the site, the Kaispeicher A, cannot be saved and will be demolished, contrary to the original plans.
- According to latest reports (28 June) the city planners and investors agreed on a height of 97m.
- Rivaling designs in the competition included those by Dominique Perrault from Paris, Gigon Guyer from Zürich, Coop Himmelblau from Vienna and SOM from Chicago.
- Neuesten Berichten zu Folge (28 Juni) einigten sich Stadtplaner und Investoren, daß das Hochhaus 97m hoch sein wird.
- MediaCityPort will be a new landmark for Hamburg and is supposed to strengthen the position of Hamburg as digital Capital City of Germany.
- The tower would not have been completely vertical, but would have been angled towards the western 'nose' of the building.
- The building complex would have preserved and modified the 7-level former harbour storage facility, Kaispeicher A.
- Estimated costs are around EUR 180,000,000.
- It would have provided 34,000 square meters of office space, 2,000 square meters of apartments, 6,000 square meters of health and fitness facilities, plus space for several restaurants, a night club and a media academy.
- In September, 2003, it was announced the project has officially been cancelled. After two years of planning, the developers could not come up with a sustainable concept for the building. Furthermore, they couldn't find enough tenants to fully lease a gross floor area of 50.000 squaremetres.

Get Emporis Research today and benefit from our worldwide database now!

Analyze buildings, construction markets, regions and competitors

- 450,000 buildings from a wide range of categories such as residential, office, retail, hospitality and many more
- Choose from a broad range of regional data packages – or create your own
- Powerful and fast search for in-depth analysis
- Detailed search queries in over 50 data fields, e.g. filter by location, size, status, building usage and construction types
- Generate customized lists of construction projects and involved companies

Generate leads and explore new business opportunities

- Get contact information for over 160,000 companies
- Search for companies related to specific construction projects or generate lists according to particular fields of activity
- Find new clients and business partners or connect with key players in new markets
- Forecast trends and future market growth
- Spend less time researching, and more time doing business

Keep up to date and ahead of your competitors

- Get constantly-reviewed data from around the globe
- 24/7 access to the database from anywhere in the world
- View detailed information about existing buildings as well as those planned and under construction
- Save your searches for easy future reference
- Receive email notifications about new content fitting your criteria

Download data and put it to work

- Export information easily to CSV/Excel files
- Individually select data fields for your specific needs
- Integrate the data into your own internal system
- Provide your staff with actionable data
- Benefit from limitless downloads within your chosen package
